

- Monitor and evaluate machine learning models

You will also learn about the different cloud platforms that are available for machine learning, including Our Book Library Web Services (AWS), Microsoft Azure, and Google Cloud Platform (GCP).

### Who This Book Is For

This book is for anyone who wants to learn how to build and deploy machine learning models using Python and the cloud. This includes:

- Data scientists
- Machine learning engineers
- Software engineers
- Business analysts
- Anyone who wants to learn more about machine learning

### About the Author

I am a data scientist with over 10 years of experience in building and deploying machine learning models. I have worked on a wide range of projects, from predicting customer churn to detecting fraud. I am passionate about teaching others how to use machine learning to solve real-world problems.
