

Two Dudes, One Fry Oil Powered Car, and a Cross-Country Search for a Greener Future

When best friends Keith Habersberger and Max Sidorov decided to embark on a cross-country road trip, they knew they wanted to do it in a way that was both fun and environmentally conscious. So they converted a 1986 Mercedes-Benz 300SDL to run on recycled fry oil, and set off on an adventure that would take them through 26 states, over 10,000 miles, and into the heart of the American sustainability movement.

Their journey, which they documented in their book *Two Dudes, One Fry Oil Powered Car, and a Cross-Country Search for a Greener Future*, is a fascinating and inspiring account of their experiences. Along the way, they met with farmers, scientists, activists, and everyday people who are working to create a more sustainable world. They learned about the

challenges of transitioning to renewable energy, the importance of reducing waste, and the power of community action.

But their journey was not without its challenges. The car they were driving, affectionately known as "Frybrid," was prone to breaking down. They often had to rely on the kindness of strangers to help them fix their car or find a place to stay. But through it all, they never lost their sense of humor or their commitment to their mission.

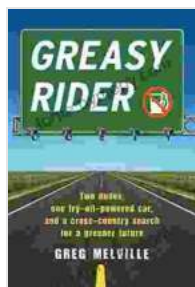

Two Dudes, One Fry Oil Powered Car, and a Cross-Country Search for a Greener Future is a must-read for anyone who is interested in sustainability, alternative energy, or simply in the spirit of adventure. It is a story that will inspire you to think differently about the way we live and to take action to create a more sustainable future.

What You'll Learn from *Two Dudes, One Fry Oil Powered Car, and a Cross-Country Search for a Greener Future*

- The challenges and opportunities of transitioning to renewable energy
- The importance of reducing waste and finding creative ways to reuse and recycle materials
- The power of community action and the importance of working together to create a more sustainable world
- The many different ways that people are working to create a greener future
- The importance of having a sense of humor and a positive attitude, even when things get tough
